

Licensed Practical Nurse

Professional Activities

Licensed practical nurses (LPNs), or licensed vocational nurses (LVNs), care for people who are sick, injured, convalescent, or disabled under the direction of physicians and registered nurses. LPNs care for patients in many ways. Often, they provide basic bedside care. Many LPNs measure and record patients' vital signs such as height, weight, temperature, blood pressure, pulse, and respiration. They also prepare and give injections and enemas, monitor catheters, dress wounds, and give alcohol rubs and massages.

As part of their work, LPNs collect samples for testing, perform routine laboratory tests, and record food and fluid intake and output. They clean and monitor medical equipment. Sometimes, they help physicians and registered nurses perform tests and procedures. Some LPNs help to deliver, care for, and feed infants.

LPNs also monitor their patients and report adverse reactions to medications or treatments. LPNs gather information from patients, including their health history and how they are currently feeling. They may use this information to complete insurance forms, pre-authorizations, and referrals, and they share information with registered nurses and doctors to help determine the best course of care for a patient. LPNs often teach family members how to care for a relative or teach patients about good health habits.

Most LPNs are generalists and will work in any area of healthcare. However, some work in a specialized setting, such as a nursing home, a doctor's office, or in home healthcare. LPNs in nursing care facilities help to evaluate residents' needs, develop care plans, and supervise the care provided by nursing aides. In doctors' offices and clinics, they may be responsible for making appointments, keeping records, and performing other clerical duties. LPNs who work in home healthcare may prepare meals and teach family members simple nursing tasks.

Most licensed practical nurses in hospitals and nursing homes work a 40-hour week, but because patients need around-the-clock care, some work nights, weekends, and holidays. They often stand for long periods and help patients move in bed, stand, or walk.

LPNs may face hazards from caustic chemicals, radiation, and infectious diseases such as hepatitis. They are subject to back injuries when moving patients and shock from electrical equipment. They often must deal with the stress of heavy workloads. In addition, the patients they care for may be confused, irrational, agitated, or uncooperative.

Educational Requirements

Most practical nursing programs last about 1 year and include both classroom study and supervised clinical practice (patient care). Classroom study covers basic nursing concepts and patient care-related subjects, including anatomy, physiology, medical-surgical nursing, pediatrics, obstetrics, psychiatric nursing, the administration of drugs, nutrition, and first aid. Clinical practice usually is in a hospital, but sometimes includes other settings.

All States and the District of Columbia require LPNs to pass a licensing examination after completing a State-approved practical nursing program. The National Council Licensure Examination, or NCLEX-PN, is required in order to obtain licensure as an LPN. The exam is developed and administered by the National Council of State Boards of Nursing. A high school diploma or its equivalent usually is required for entry, although some programs accept candidates without a diploma.

In some employment settings, such as nursing homes, LPNs can advance to become charge nurses who oversee the work of other LPNs and of nursing aides. Some LPNs also choose to become registered nurses through numerous LPN-to-RN training programs.

Employment/Salary Outlook

Employment of LPNs is expected to grow by 21 percent between 2008 and 2018, much faster than the average for all occupations, in response to the long-term care needs of an increasing elderly population and the general increase in demand for healthcare services.

In addition to projected job growth, job openings will result from replacement needs, as many workers leave the occupation permanently. Very good job opportunities are expected. Rapid employment growth is projected in most healthcare industries, with the best job opportunities occurring in nursing care facilities and in home healthcare services. There is a perceived inadequacy of available healthcare in many rural areas, so LPNs willing to locate in rural areas should have good job prospects.

State and National Wages

Location	Pay Period	2009				
		10%	25%	Median	75%	90%
United States	Hourly	\$13.89	\$16.31	\$19.14	\$22.70	\$26.49
	Yearly	\$28,900	\$33,900	\$39,800	\$47,200	\$55,100
Illinois	Hourly	\$14.10	\$16.48	\$19.61	\$22.85	\$25.73
	Yearly	\$29,300	\$34,300	\$40,800	\$47,500	\$53,500

State and National Trends

United States	Employment		Percent Change	Job Openings ¹
	2008	2018		
Licensed practical and licensed vocational nurses	753,600	909,200	+21%	39,130
Illinois	Employment		Percent Change	Job Openings ¹
	2008	2018		
Licensed practical and licensed vocational nurses	24,690	29,700	+20%	1,270

¹Job Openings refers to the average annual job openings due to growth and net replacement.
